

Coronavirus (Covid-19) and Frost Popsicles

This is definitely a first for us as a business, but given the fear and sometimes inaccurate information being disseminated through the press and social media, we felt it necessary to put our customers' minds at ease so far as our products are concerned.

Since we first launched our premium alcoholic & non-alcoholic Popsicle ranges in September 2016, we have always followed strict food safety and production standards when it comes to our product handling and manufacturing.

Our partner manufacturing facility is FSSC 22000 certified – a fully recognized Global Food Safety Initiative based on existing ISO Standards. Thorough hygiene and cleanliness protocol has always been adhered, and our Popsicles are filled and heat-sealed on a fully-automated production line.

We are a unique, growing business and brand wholly committed to our customers and suppliers, and despite the local and global uncertainty around “what next?” we always have, and will continue to go above and beyond in terms of our service delivery.

Thank you for your continued support - we very much appreciate it!

Please stay safe, stay informed, but most importantly, in these times of worry and angst, don't forget to use common sense and smile 😊

Jon-Marc, Natasha & the Frost Popsicles Team
